THE BAGLEY SIGNAL

W. W. BAGLEY & SONS
MARTINDALE, TEXAS

VOLUME NO. 18

1941-42 SEASON

MAKE MORE COTTON DOLLARS

USE BAGLEY PEDIGREED SEED

W. W. BAGLEY — Founder, Breeder and Grower,
As He Appears Today.

Dear Fellow Grower:

We wish to take this means of expressing our appreciation for the wonderful reception accorded our BAGLEY PEDIGREED COTTONSEED since it was first introduced on the market a number of years ago. The widespread popularity of our cotton is manifest in the large number of satisfied customers who re-order each year. Approximately 85% of our sales each season is repeat business which is positive proof that our BAGLEY COTTON is meeting grower's expectations and netting them MORE COTTON DOLLARS on their planted acres.

During our 26 years of breeding our first aim has always been to breed our cotton to meet the needs of the Grower. Our cotton has shown consistent improvement down through the years until today the Bagley Plant is really a thoroughbred, embodying in a well-balanced proportion all of the desired characteristics of a Money-Making Cotton. Just as the glass-less, square-bodied cars of earlier days appear obsolete by the side of the ultra-modern, sleek limousines of today; likewise the 1915 cottons were devoid of the perfectly balanced features incorporated in our BAGLEY PEDIGREED COTTONSEED of today.

We are glad that we have a superior seed to offer our friends and customers. Nothing gives us greater pleasure than to see Bagley Growers make More Cotton Dollars. We sell only seed grown under our direct supervision and control. This is the reason we can guarantee every bushel of BAGLEY PEDIGREED COTTONSEED to meet our standards of Quality and Purity 100 Per Cent.

ORDER NOW AND SAVE MONEY!

It behooves every Cotton Grower to plant the very best seed he can get. Seldom do we have enough seed to fill the ever-growing demand. During past years we have returned literally thousands of orders we could not fill because our supply was exhausted. The price is very likely to advance in the near future. SAVE MONEY by ordering NOW. Grow a paying crop of cotton next year. You will find an order blank on the last page of this folder and we will be glad to hear from you right away.

Very sincerely yours,
W. W. BAGLEY & SONS.

STATE REGISTERED COTTON BREEDERS.

Bagley Cotton Is a Safe, Dependable Variety — It Is Properly Bred

BAGLEY PEDIGREED COTTON has proven itself to be a safe, dependable variety in the eyes of thousands of cotton growers. New customers are being welcomed each year who are joining the list of satisfied growers. All customers who will be ordering BAGLEY SEED this season will also be getting the benefit of the newest improvements being developed on the Bagley Cotton Breeding Farms. Our breeding operations are not allowed to become stagnant and we have never come to the point yet to say "it is good enough," but rather we are constantly in the field carefully seeking out those features which can be improved, and making such improvements as rapidly as possible so as to enable the Bagley Growers to make more profits. Our every effort is bent toward the end of developing our cotton to the finest degree of perfection. Our entire time and all of our thoughts, energy and resources are utilized in breeding and growing the very best seed that it is possible to produce. Every bushel of our Newest Improved BAGLEY PEDIGREED COTTONSEED is absolutely guaranteed to grow like we say it will under average and normal conditions.

Some varieties produce a long staple; others may produce a good lint turn-out and some produce large yields with "inferior" staple; while there are other varieties that are adaptable to only certain types of soil.

In our Newest Improved BAGLEY PEDIGREED SEED you have a "well-balanced" variety with all the good features bred into the seed that help you to grow a real money-making crop. When you plant BAGLEY SEED you have a seed that have bred into them a good lint turn-out, usually averaging 40 per cent and better; a seed bred with a large, drooping boll and a heavy producing plant; a seed bred with a long, even fiber that will bring top market price; a seed that is not partial to any particular section, but will give good returns on any soil that will grow cotton. In addition, you have an Early Maturing plant that makes in from 90 to 110 days (from planting time to harvest) dependent, of course, on soil and season. Also the big, five-lock bolls are easily picked and are as near storm and wind-proof as it is possible to breed cotton.

A visit to the Breeding Farms owned and operated by W. W. BAGLEY & SONS reveals the proportions of their endeavors. Highly gratifying are the rows and rows of cotton plants holding for onlookers the result of their sagacity, patience and never-ending work. No less engaging is a visit to the Bagley Offices and Main Warehouses located on State Highway No. 80 in Martindale, Texas. It is here that Bagley & Sons meet their friends and guests and talk to them about their obsessing interest, "Cotton Breeding."

Plant a Seed Block

You will find it very profitable to purchase enough Highly Bred Pedigreed Seed each year to plant a Seed Block on your Farm. It will involve only a nominal expense and you will be able to produce enough good seed with which to plant your entire farm each year. It pays to secure the most highly developed Pedigreed Seed that you can get for planting your Seed Block. Our State Registered BAGLEY PEDIGREED SEED will give you the most profitable results. Order early to be sure of a supply for next year.

Only One Source

The Original and Genuine BAGLEY PEDIGREED COTTONSEED are bred, grown and sold only by W. W. BAGLEY & SONS, MARTINDALE, TEXAS. Accept no substitutes... Order direct from the Originators and Breeders to be sure you get pure seed and full value for your money. Every bag we ship bears our Trade-Mark for your protection.

BELOW ARE SHOWN THE OFFICES AND MAIN WAREHOUSES WHERE BAGLEY PEDIGREED SEED ARE TESTED, CURED AND STORED

A FAVORITE WITH FARMERS EVERYWHERE — — — BAGLEY SEED

FIRST CHOICE

WITH COTTON GROWERS ALL OVER THE SOUTHWEST

Makes Over Bale Per Acre In Spite of Drought

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

Last year was my first year to grow BAGLEY COTTON and I found it to be the best cotton I had ever grown. It was a very dry season, but I made an average of over a bale per acre anyway. I received 43% turn-out at the gin and my ginner tried to buy all my seed to plant on his farm. My cotton brought the top price on the market. I am planting all BAGLEY this year as it stands the drought better than any cotton and is the easiest to pick and makes more money per acre.

Yours very truly,
M. W. Wallace,
Rt. 3, Willis Point, Tex.

1200 Lbs. Seed Cotton Makes 500-Lb. Bale

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

I am very much pleased with your cotton. I have just planted it one year, but I like the turn-out so well I want to plant it again this year.

I had 1200 lbs. of seed cotton and got a 500-lb. bale of lint and I found it easy to pick.

Yours truly,
T. W. Carroll,
Rt. 2, Edgewood, Tex.

Best Cotton Ever Planted

W. L. BARNES

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

Please send me five sacks instead of four sacks of your BAGLEY PEDIGREED COTTONSEED. I think you have the best cotton I ever planted. I made 40% lint on an average all Fall.

As ever your friend,
W. L. Barnes,
Route 2, Frisco, Texas.

Lists Turn-Outs From Bagley Cottonseed

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

I am listing below some turn-outs I have received from my BAGLEY COTTON.

Four bales from my farm in Trinity River Bottom:

- 1250 lbs. seed cotton—bale weighed 534.
- 1250 lbs. seed cotton—bale weighed 533.
- 1355 lbs. seed cotton—bale weighed 576.
- 1400 lbs. seed cotton—bale weighed 587.

Two bales from my sand farms:

- 1380 lbs. seed cotton—bale weighed 553.
- 1406 lbs. seed cotton—bale weighed 560.

Yours very truly,
L. H. Colbert,
Oakwood, Texas.

Bagley Cotton Stands Drought Better

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

BAGLEY COTTON has withstood this long, continued drought better than any other cotton. Making a good gin turn-out and also an inch staple. We have had eleven weeks drought.

As ever your friend and booster,
(Signed) Stephen J. Cook,
Rt. 1, Jacksonville, Tex.

Your Seed Are the Best

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

Make my order for six bushels instead of three. I have planted your seed for four years and have found them to be the best. Please ship my seed 1st of March.

Your customer,
(Signed) W. W. Edwards,
Rt. 3, Kaufman, Tex.

Bagley Is The Best Cotton To Grow

JOHN JANYSEK

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

I will plant most of my field in BAGLEY COTTON, as it is the best cotton to grow.

Yours truly,
John Janysek,
Star Route,
Helena, Texas.

Likes Bagley Seed Best

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

I am sending my order for six bushels of your good cottonseed. I think you have the best cottonseed I ever planted. You may send my order the first of March.

Thanks,
(Signed) W. M. Sawyer,
Route 4, Box 90,
Brownwood, Texas.

Bagley Cotton Has Best Staple in Dry Section

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

All who planted BAGLEY SEED in the Terrell community are well pleased with it.

I sold two bales of my BAGLEY COTTON to the Government Buyer, and he said the government would like to buy two million bales of that cotton. He said it was the best staple in this dry section.

Yours truly,
W. R. Vaughan,
Royce City, Texas.

Dry Weather Fails To Affect Bagley Turn-Out

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

Most everyone likes the BAGLEY COTTON here.

Just yesterday I ginned right behind a bale load of snapped cotton with 2100 lbs. seed 870 lbs. bale weighed 515 lbs. My BAGLEY snapped 1660 lbs. seed 800 lbs. bale 515 lbs. These records are at the Farmers Gin Co., under date of 9/19/39.

It has been dry here this season. In fact the driest in several years.

Yours truly,
C. D. Spelce,
Byers, Texas.

Likes To Pick Bagley Cotton

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

I am enclosing my check to cover my order of six bushels of your PEDIGREED PLANTING SEED.

I am looking forward to another good crop with BAGLEY COTTON. We like to pick in BAGLEY COTTON and like the way it fruits, too.

I thank you.

Very sincerely yours,
Wilson H. Wieting,
Rt. 1, Marlin, Texas.

A BALE PER ACRE

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

I am writing you in regard to your seed. My BAGLEY made the best cotton I have this season. I picked one bale of BAGLEY, 1480 pounds seed cotton, and my bale weighed 678 pounds. It made a bale to the acre. The balance made one-fourth of a bale to the acre. I like your seed fine and will back them all I can.

Yours truly,
(Signed) W. R. Jones,
Millersview, Texas.

Favorable Results From Bagley Pedigreed Cottonseed

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

Attached you will find three orders for one sack each. These three men report very favorable results from your cotton this past season — by far out-yielding the cotton adopted here — better yield per acre, much better lint turn-out, better grade and staple.

Yours truly,
(Signed) Pat Mitchell,
Haskell, Texas.

You Don't Have To Talk For Your Seed — They Speak For Themselves

Dear Mr. W. W. Bagley & Sons:

I am writing you in regard to your pure-bred BAGLEY SEED for years. You don't have to talk for your seed — they speak for themselves. They do all you say about them and more, too, out here on this poor land. There are none I have tried that can come up to them.

Very truly yours,
(Signed) Dock Thompson,
Rt. 2, Box 651,
Texarkana, Texas.

Extra Lint Per Cent — Better Price for Staple

J. E. HINDMAN

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

I am getting an extra lint per cent at the gin and a better price for my BAGLEY COTTON in Texas because of the longer staple.

Other farmers are getting interested.

Yours truly,
(Signed) J. E. Hindman,
Route 1, Terrell, Texas.

Tried Other Seed Then Turned Back To Bagley

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

I must drop you a few lines about your cottonseed.

The seed came up to a good stand; every seed came up. I let my neighbors have a sack each and all came up good. Last seed I had from you made 42% lint. I tried other seed and now I turn back to BAGLEY.

Yours very truly,
(Signed) Oliver Driska,
Rt. 1, Granger, Texas.

The Best All-Round Cotton In This Section

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

Please ship my seed as per order.

I was well pleased with my BAGLEY SEED and COTTON last year and believe it is the best all-round cotton grown in this section.

(Signed) G. W. Goodwin,
Route 4,
Willis Point, Texas.

Makes \$105.00 More On 3-Bu. Sack Bagley Seed

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

I am glad to give you a report on test made last season with BAGLEY and two other varieties of cotton. I had three blocks of five acres each and planted 3 bu. of BAGLEY REGISTERED COTTONSEED on one five-acre block and 3 bu. each on the other two blocks of the best seed from the breeders of two other leading varieties of cotton. My BAGLEY COTTON made 2994 lbs. lint cotton from 7050 lbs. seed cotton on the five acres, which is better than a bale per acre. My other cotton on each of the five-acre blocks made a few pounds more than 1700 lbs. of lint cotton. The BAGLEY made nearly twice the yield as my other cotton and I figure my BAGLEY COTTON made me \$35.00 more per bu. (or \$105.00 more on the 3-bu. sack) than the other varieties.

Yours very truly,
(Signed) J. J. Hedding,
R.F.D. No. 7,
Canton, Texas.

Wouldn't Plant Any Other Variety

W. W. Bagley & Sons, Martindale, Texas, Dear Mr. Bagley:

I have twenty-seven acres of BAGLEY COTTON. Wouldn't plant anything else. It's the best all round cotton I ever planted. One of my friends came to me and asked me what was the best cotton to plant. I told him BAGLEY. I gave him an order blank and he ordered one sack from you.

(Signed) J. M. Clark,
Route 3, Box 78,
Alto, Texas.

Makes Over Three Bales From Only One Sack

W. W. Bagley & Sons, Martindale, Texas, Gentlemen:

I bought a sack, 3 bushels, of your BAGLEY BETTER PEDIGREED COTTONSEED this year and planted 4 acres. I have picked 3 bales of cotton off of the 4 acres and will get a remnant.

First seed cotton—1420—lint 585.
Second seed cotton—1330—lint 573.
Third seed cotton—1320—lint 562.

Am sending an order for more BAGLEY SEED.

(Signed) R. R. Rand,
Personville, Texas.

The Best Cotton I Have Ever Seen Growing

J. F. BROWN AND WIFE

W. W. Bagley & Sons, Martindale, Texas, Dear Sirs:

Would like to have the price on 100 bushels of seed at your plant. I think BAGLEY COTTON is one of the best cottons that I have ever seen growing.

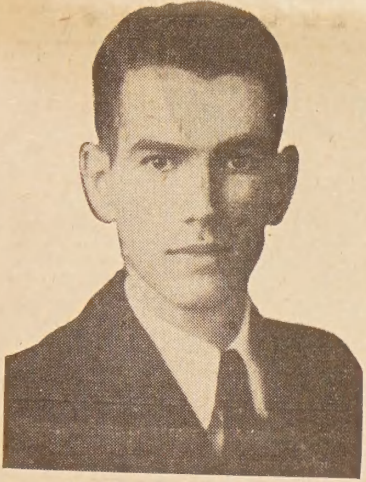

Yours respectfully,
(Signed) J. F. Brown,
Route 3, Troup, Texas.

WE'VE GOT THIS GUY "ON THE SPOT"

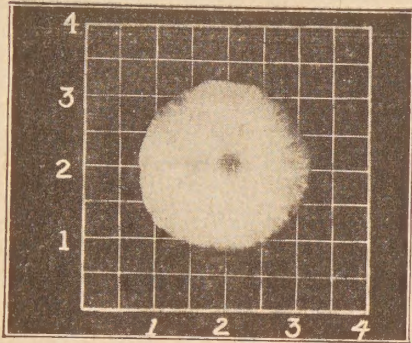

YOUR SEED DOLLAR BUYS MORE — WHEN YOU INVEST IT IN BAGLEY SEED

SCIENTIFIC BREEDING METHODS KEEP BAGLEY QUALITY HIGH

W. W. BAGLEY, JR.

The primary duties of W. W. Bagley, Jr., are to attend to the Office Detail in connection with the breeding, growing, ginning, storing, selling, and shipping of Bagley Pedigreed Cottonseed. This department of work requires constant every day attention and close personal supervision which is prerequisite to the advancement of the business in giving better seed service to our friends and customers.

Long, Hard, Uniform,
1 to 1-16-Inch Staple

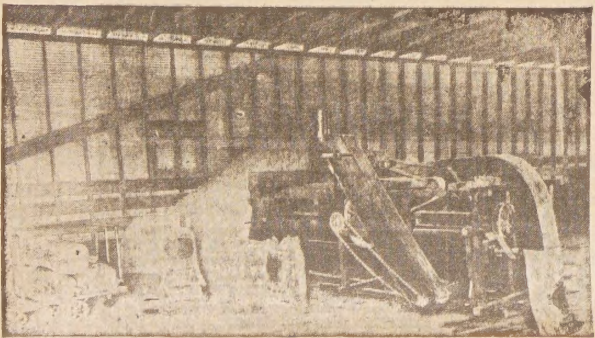

sold on staple merits. Cotton Textile Mills can afford to pay more for BAGLEY STAPLE COTTON which shows little waste in the spinning process. Much attention is being devoted each year to maintaining and improving the high quality staple which we now have.

BAGLEY PEDIGREED COTTON has a Smooth, Even, Strong, Hard Staple of an inch to an inch and one-sixteenth in length, depending on soil and season. It is not uncommon to hear of growers selling their BAGLEY COTTON from 100 to 200 points on which gives them from \$5.00 to \$10.00 per bale premium. The uniformity and good character of the Bagley Fiber, produced under normal conditions, commands a nice premium wherever cotton is

BAGLEY COTTON is bred to give you an average Gin Turn-out of from 40 to 42%, dependent on soil and season. Lint Per Cent or Gin Turn-out is an important factor in figuring your returns per acre in Dollars and Cents. Every farmer likes to get a good Turn-out. It means you will save on your picking and ginning and, production being the same, a good gin turn-out gives you more

lint per acre. None of us grow cotton for the fun of growing it; what we are interested in is the returns we receive in Dollars and Cents. The Good Turn-out of BAGLEY COTTON lessens your cost of production thereby helping you to realize more Dollars and Cents on every acre.

Electric Air-Blast Culling Process

After BAGLEY PEDIGREED SEED have been properly cured they are put through the culling, cleaning, treating and sacking processes. All of our seed are run through modern, electrically-powered, air-blast Culling Machines (like the one pictured above) which remove inert matter, lint, undeveloped seed, oversized seed, LEAVING ONLY THE WELL-FILLED OUT, UNIFORM SIZED SEED WHICH WE SHIP OUR CUSTOMERS. These culled seed are then carefully treated with a dust disinfectant which aids germination and engenders faster, early growth. After treatment they are weighed and sacked in our new, 3-bushel, trademarked bags ready for shipment. We wish it were possible for every Cotton Grower to visit our Breeding Plant while we are preparing BAGLEY PEDIGREED COTTONSEED for sale, in order that every one might see for himself the thorough methods which we employ.

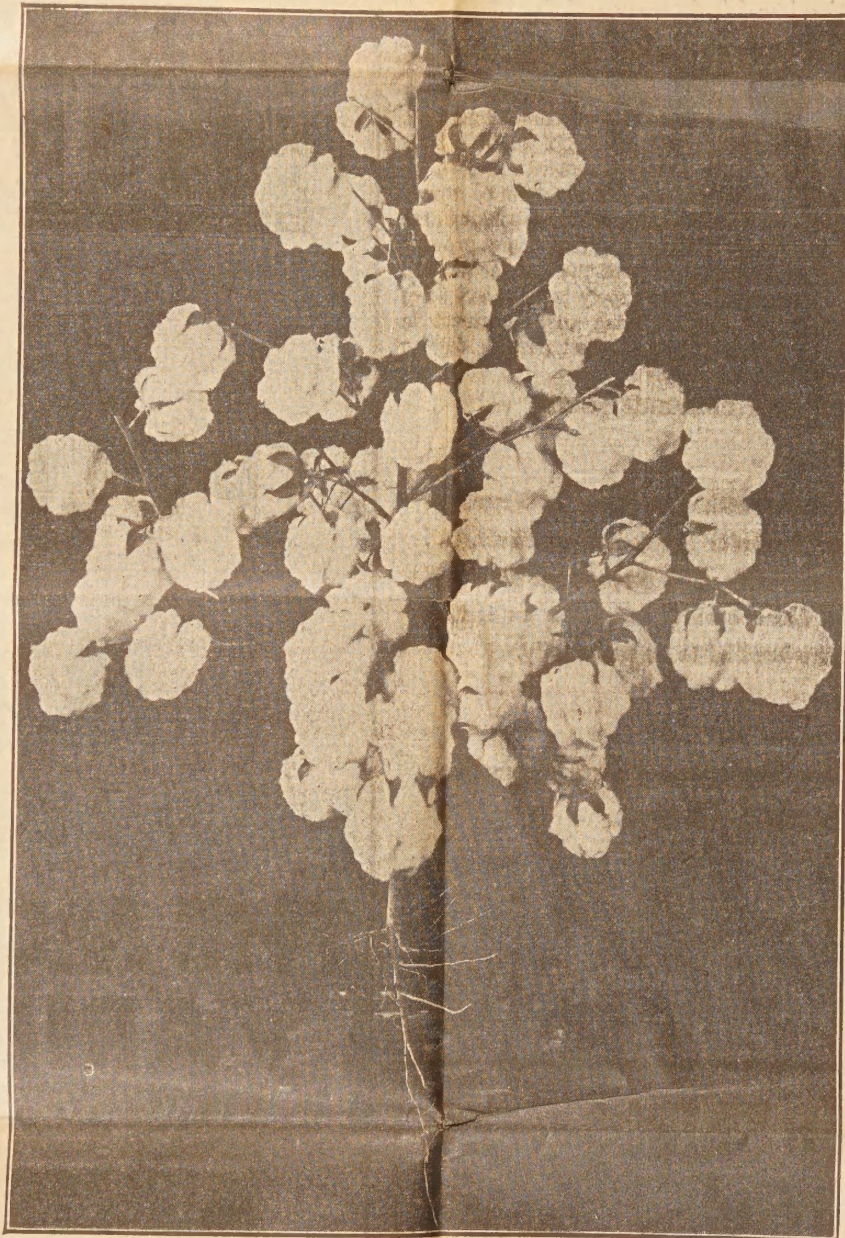

EVERY SINGLE OPERATION IN THE BREEDING AND GROWING OF BAGLEY PEDIGREED COTTONSEED IS PERSONALLY DIRECTED AND CAREFULLY EXECUTED BY W. W. BAGLEY & SONS

We do not entrust the breeding of our Newest Improved BAGLEY PEDIGREED COTTONSEED to others. We attend to every single phase of the work ourselves. The three members of our firm devote their entire time and thought to the continued improvement of BAGLEY COTTON. By having a firm member to look after each department of work we are better able to maintain and improve the quality of BAGLEY SEED than are those men who, by necessity, have to place any phase or all of this important work in the hands of disinterested parties who only "half-do" the job. Shipping you quality seed means something to us. We are in the business to stay and satisfied customers are our best advertisement. We offer you better seed backed by 26 years of good, sound breeding. When you invest in State Registered BAGLEY PEDIGREED COTTONSEED you can be sure of getting seed that have been properly bred, grown, ginned and handled.

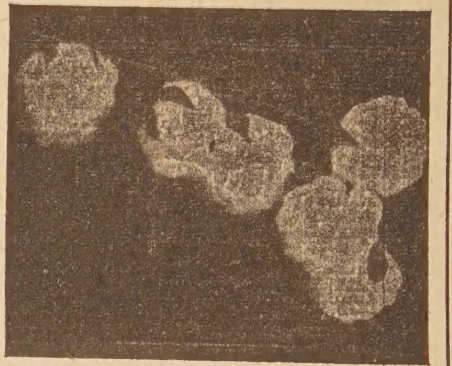

D. R. BAGLEY

Mr. D. R. Bagley devotes his untiring efforts chiefly to the Field Work in the breeding, growing, ginning and storing of Bagley Pedigreed Cottonseed. Through every stage of the growing season he carefully watches the progress of the cotton taking note of each particular family of cotton which we develop each year. The hybridization work, and the thousands of individual boll, stalk, row, and increase progenies carried on each year demand the utmost careful attention.

A TYPICAL BAGLEY STALK

Ordinarily our BAGLEY COTTON makes from 10 to 20% More Per Acre than common varieties. During our breeding procedure, year after year, particular attention has been focused on developing a sturdier, more vigorous stalk; one that will develop squares and set bolls rapidly. Our present compact, pyramid-type stalk (shown at left) gives you an idea of the prolificness of our cotton. Our short-jointed, heavy-bearing fruiting branches with a maximum of large, five-lock drooping bolls are added advantages of our BAGLEY COTTON. The Bagley Boll is easily picked, yet it will stay in the boll during wind and rain. It has a reasonably thin burr that opens nicely and picks clean. It is often reported by growers that a bale of good Bagley Cotton can be picked in one-half the time required to pick a bale of smaller boll cottons.

10 to 20% More Per Acre Than
Ordinary Varieties

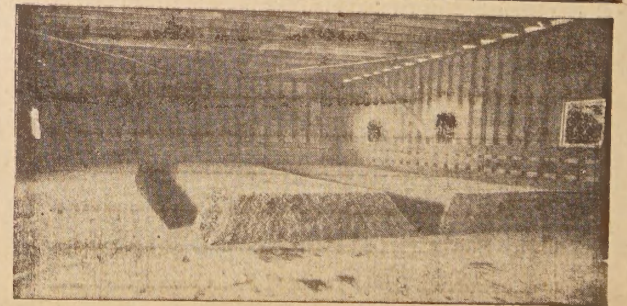

The Deep, Penetrating Root System makes Bagley Cotton a real Drought Resister and insures you of a good yield per acre where other varieties suffer. Because of this feature the Bagley Plant continues to put on long after ordinary varieties, with poor root systems, have become completely exhausted. The Bagley stalk also has a healthy, vigorous lateral root spread that helps to increase production. The foundation of any structure should be of the very best material. You can rely on the Bagley Root System to do its part in making you more Dollars since we have emphasized this in our breeding work each year realizing that this is a very important feature.

Deep, Penetrating Tap Roots
Insure Good Yield Per Acre

Bagley Cotton Is Being Made Better Each Year

The efficient and painstaking manner in which BAGLEY PEDIGREED COTTON is being bred and grown each season accounts for its widespread endorsement and popularity among Cotton Growers everywhere. Since the origination of BAGLEY COTTON it has been gradually growing in the favor of Cotton Growers until today it is recognized as "A Truly Great Cotton"; one that is known for its big money-making features. In addition to the good features represented and depicted by the photographs on this page BAGLEY PEDIGREED COTTON is Early Maturing and is well-acclimated and adaptable to practically every soil and climate where cotton is grown. It begins setting fruit quickly during the growing season and Matures Early, thereby reducing somewhat the possibility of excess damage by insects.

BAGLEY COTTON has a maximum of long, short-jointed fruiting branches with an absolute minimum of vegetative branches that decrease the amount of foliage on the stalk. The fact that BAGLEY COTTON has few vegetative branches (limbs that do not bear fruit) is partly responsible for the heavier yields it makes over other varieties. The Bagley Plant utilizes the most of the plant food derived from your soil in bearing fruit and no undue amount goes to produce useless vegetation. BAGLEY PEDIGREED COTTON has a Varietal Purity of 99 1-2 per cent. This insures uniform growth in your field and a uniform quality of cotton; and, in addition, means that you should have very little, if any, off-type stalks in your second year seed unless you receive a mixture from some other source.

All Seed Properly Cured

As Breeders of High Grade BAGLEY PEDIGREED COTTONSEED, we realize fully the vital importance of proper care and treatment of seed before offering them for sale. We know that every farmer wants seed of uniform size that plant easily, and are well cured and treated in order to get a better germination and stand. BAGLEY PEDIGREED SEED are taken directly from the gin to our large, roomy seedhouses to be cured. All BAGLEY seedhouses are constructed especially for curing purposes and are equipped with ventilators which allow fresh air to circulate at all times, both above and below the seed. Large ventilators are built in the roofs and numerous windows underneath the floor also allow a continuous current of air to pass under the building keeping the seed as cool on the bottom as they are on top. While in the "green" state BAGLEY PEDIGREED SEED are kept well spread out and are turned almost continuously to prevent any heating. We take pride in the High Quality Seed that we ship and spare no expense or time in the necessary care and preparation of our seed.

"Continuous Improvement Keeps BAGLEY PEDIGREED SEED Ahead"

Preparing Bagley Seed for Shipment

Shipment of Bagley Seed Goes Out
To Texas Cotton Farmers

Numerous voluntary reports coming from Cotton Growers in different sections of the State show that BAGLEY COTTON is really doing the job and netting growers More Money Per Acre. One grower reports that he made \$105.00 more on 3 bu. Bagley Seed than on two other varieties (each of the three varieties being planted in a 5-acre test block). This letter may be found on Page 2 of this folder for further details. Hundreds of other letters coming in show that BAGLEY COTTON is widely-adaptable and truly dependable as an all-round variety.

Supply Limited! Demand Is Heavy!

Due to our fixed policy of breeding, growing and selling only BAGLEY PEDIGREED COTTONSEED produced under our direct personal supervision our supply is at all times confined to the seed we grow on our limited acreage. From us you get the GENUINE BAGLEY PEDIGREED SEED or none at all. When all of these seed are sold, we have no more seed to offer until another crop can be grown. A recent check-up of our records reveals that bookings are way ahead of last year. This means that more growers are ordering earlier in anticipation of the heavier demand for good seed. Also it means our supply is being cut down more rapidly and you will be using wise judgment in placing your order with us at the earliest possible date to make sure of getting your supply of

BAGLEY PEDIGREED SEED

Place your order with Our Agent in Your Section or use the Order Blank below at left. All orders placed with Our Representatives will receive the same careful attention as if they were handed to us personally.
